ÖNEMLİ AÇIKLAMA (Lütfen okuyunuz)

- ZOOM bağlantısı için yukarıda verilen bağlantıyı veya yine yukarıda verilen giriş bilgilerini kullanabilirsiniz.
- Oturum içerisinde en KIDEMLİ olan moderatör olarak seçilir. Moderatörün oturum düzenini gözetmesi, akademisyen adaylarını yönlendirmesi beklenmektedir.
- Oturuma bağlanmadan önce Salon numaranızı adınızın önüne aşağıdaki gibi ekleyiniz. Bu sayede kongre açılışında beklemeden oturumlarınıza gönderilebileceksiniz. Ör. 5 Ahmet Ahmetoglu
- Sunum süresi 10 dakikadır. Bu sürenin aşılmasını moderatörler temin edecektir.
- Sunum sonrası 5 dakikayı geçmeyen soru-cevap, tartışma süresi verilmektedir.
- Sunumlar TÜRKÇE veya İNGİLİZCE yapılabilmektedir.
- Kameralar, oturum süresince toplam % 70 oranında açık olmak zorundadır.
- Sunum yapan katılımcının kamerası açık olmak zorundadır.
- Sunum yapmak zorunludur. Herhangi bir nedenle sunum yapmamış olan katılımcıya sertifika verilmesi ve çalışmasının yayınlanması söz konusu olamaz.
- Katılımcı, kendi oturumda, oturum bitene kadar bulunmak zorundadır.
- Katılımcıların kendi oturumları dışındaki oturumlara katılma zorunluluğu yoktur.
- ZOOM platformunun kapasite sınırı nedeniyle, DİNLEYİCİ, sadece kapasite izin verdiği sürece kabul edilebilmektedir.

IMPORTANT, PLEASE READ CAREFULLY

- To be able to make a meeting online, login via <https://zoom.us/join> site, enter ID instead of “Meeting ID or Personal Link Name” and solidify the session.
- The Zoom application is free and no need to create an account.
- The Zoom application can be used without registration.
- The application works on tablets, phones and PCs.
- Speakers must be connected to the session **10 minutes before** the presentation time.
- All congress participants can connect live and listen to all sessions.
- During the session, your camera should be turned on **at least %70** of session period
- Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.

TECHNICAL INFORMATION

- Make sure your computer has a microphone and is working.
- You should be able to use screen sharing feature in Zoom.
- Attendance certificates will be sent to you as pdf at the end of the congress.
- Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.
- Before you login to Zoom please indicate your name surname and hall number,

		2	API GÜVENLİĞİ: GÖMÜLÜ VE AÇIK FİNANS UYGULAMALAR	Nimet Şahin , Dr. Esra Yücel
		3	KIRSAL ALANLARDA KÜÇÜK VE ORTA ÖLÇEKLİ İŞLETMELERİN FİNANSA ERİŞİMİ: ENDONEZYA VE TAYLAND ÖRNEĞİ	Buket Oran, Dr. Öğr. Üyesi Fatma Fındık
		4	KOBİ'LERİN FİNANSA ERİŞİMİ: TÜRKİYE ÖRNEĞİ – MODEL YAKLAŞIMI	Nimet Demirci. Doç . Dr. Sevil Doğan
		5	FINANSAL KARAR VERME: TÜRKİYE'DEN FİNANS ÖĞRENCİLERİ ÜZERİNE AMPİRİK BİR ÇALIŞMA	Doç .Dr. Hakan Aydın
		6	ETİK FİNANS VE İSLAMİ FİNANS: ÖZELLİKLER, OLASI YAKINSAMALAR VE POTANSİYEL GELİŞİM	Dr. Öğr. Gör. Burak Uzal
		7	FINANS ÖĞRENCİLERİNİN FİNANSAL OKURYAZARLIĞI: TÜRKİYE'DEN BİR AMPİRİK ÇALIŞMA	Dr. Feyza Hacılaroğlu.

ICSAS 1st International Conference on Biochemistry and Molecular Biology March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 1	Assoc. Prof. Dr. Sékou Traoré	1	DEVELOPMENT OF AN INTERDISCIPLINARY UNDERGRADUATE COURSE COMBINING BIOLOGY AND CHEMISTRY	Emily J. Carter
		2	ENHANCED PRODUCTION OF EICOSAPENTAENOIC ACID AND FUcoxANTHIN IN COLD-ADAPTED DIATOM SPECIES	Minh Hoang Nguyen, Linh Thi Mai,
		3	BIOPROPHYLLACTIC POTENTIAL OF PYOCYANIN FROM PSEUDOMONAS AERUGINOSA AGAINST SAPROLEGNIASIS IN INCUBATED AFRICAN CATFISH EGGS	A. O. Adeyemi, B. K. Oladipo, C. M. Eze, D. F. Onifade
		4	MONITORING WILDFIRE IMPACT AND ECOSYSTEM RECOVERY USING REMOTE SENSING TECHNIQUES	Assis. Prof. Dr. R. S. Deshmukh
		5	UTILIZATION OF DRONE TECHNOLOGY IN WILDFIRE MANAGEMENT: IGNITION DETECTION AND 3D FUEL LOAD ASSESSMENT"	Ahmed Al-Mansoori, Fatima Al-Haddad
		6	ASSESSMENT OF MICROBIAL CONTAMINANTS IN DRINKING WATER FROM VARIOUS REGIONS OF JORDAN	Ahmed Al-Mansoori, Fatima Al-Haddad
		7	MAPPING RESEARCH TRENDS IN WILDFIRE MANAGEMENT IN MEDITERRANEAN ECOSYSTEMS	Amara Diallo, Assoc. Prof. Dr. Sékou Traoré
		8	Epigenetic Impact of Alpha-Particle Radiation on Drosophila melanogaster: A Short-Term Experimental Study	Muhammed Al-Shehhi

ICSAS 1st International Conference on Biochemistry and Molecular Biology March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 2	Dr. Nino Dolidze	1	DIVERSITY AND CONSERVATION OF USEFUL PLANT FAMILIES IN THE CAUCASUS REGION: A FOCUS ON ENDEMIC AND ETHNOBOTANICAL RESOURCES	Giorgi Ivanidze, Dr. Mariam Svanidze, Dr. Nino Dolidze
		2	ECONOMIC EVALUATION, GROWTH, AND PRODUCTIVITY OF GRAFTED TOMATO VARIETIES USING SOLANUM TORVUM AS ROOTSTOCK	Amina Hassan, Assis. Prof. Dr. Fatima Ahmed, Mohamed El-Sayed
		3	DIFFERENTIAL RESPONSES OF LEAF CARBON, NITROGEN, AND PHOSPHORUS TO CLIMATIC VARIABLES ACROSS BIOMES AND PLANT FUNCTIONAL TYPES	Zhang Wei, Dr. Liu Mei
		4	PHYTOCHEMICAL PROFILING AND FTIR ANALYSIS OF SAPONINS IN THREE NIGERIAN RUELLIA SPECIES: RUELLIA PROSTRATA, RUELLIA LINEARI-BRACTEOLATA, AND RUELLIA BIGNONIIFLORA	Amina O. Adeyemi, Chinedu P. Okeke, Fatima B. Musa, Ibrahim S. Eze, Grace N. Okafor
		5	IMPACT OF PHYSICAL ACTIVITY ON REPRODUCTIVE PERFORMANCE AND SEMEN CHARACTERISTICS OF JERSEY BULLS	James O. Thompson, Michael A. Richardson
		6	EXPERT EVALUATION AND CLASSIFICATION OF HERITAGE TREES: A SOUTHEAST ASIAN APPROACH	R. Sari, D. W. Putra, L. H. Wijaya
		7	FUNGAL PATHOGENS ASSOCIATED WITH THE DECLINE OF ACACIA NILOTICA AND EUCALYPTUS CAMALDULENSIS IN PUNJAB, PAKISTAN	S. Khan, Dr. R. Ali, Assis. Prof. Dr. A. Rehman
		8	EVALUATING THE CURRENT STATE AND FARMERS' PERSPECTIVES ON AGROFORESTRY IN PUNJAB, INDIA	P. Verma, A. Singh, M. Yadav
		9	ENGAGING LOCAL YOUTH IN THE PRESERVATION OF FORESTS AND PROTECTED AREAS IN NEPAL	Rajesh Thapa, Dr. Sunita Gurung

ICSAS 1st International Conference on Biochemistry and Molecular Biology March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 3	Prof. Dr. Aibek Nursultanov	1	ASSESSING WILDFIRE SUSCEPTIBILITY IN THE BIA FOREST REGION OF GHANA: AN INTEGRATED GEOSPATIAL APPROACH	Samuel Osei, Kwame Asante
		2	SEASONAL INFLUENCE OF MINING OPERATIONS ON WATER QUALITY IN THE MFOLOZI RIVER, KWAZULU-NATAL, SOUTH AFRICA	Thabo M. Dlamini, Nomvula S. Khumalo, Sipho N. Mthembu
		3	ASSESSING TREE GROWTH FACTORS IMPACTING CARBON STORAGE IN RESPONSE TO CLIMATE VARIABILITY	A. O. Mensah, K. A. Boateng
		4	ASSESSING SOIL HEALTH AND CONTAMINATION TRENDS IN A MAJOR URBAN CENTER OVER TWO DECADES	Dr. John Mwangi, Assoc. Prof. Dr. Grace Wambui
		5	EVALUATING THE EFFECTIVENESS OF MECHANIZED WEED CONTROL IN THE RESTORATION OF DEGRADED OAK FORESTS	Ahmed Al-Mansoori, Fatima Al-Harthy
		6	SEASONAL IMPACT ON TERMITE INFESTATION OF WOODEN BEEHIVES IN ENUGU, NIGERIA	Eze Nwankwo, P. U. Okeke
		7	A MATHEMATICAL FRAMEWORK FOR ANALYZING FOREST RESOURCE DEPLETION: IMPACT OF SYNTHETIC PRODUCT INDUSTRIES	Priya Sharma, Rajesh Kumar, Anjali Mehta
		7	ENHANCING CREATIVITY IN TECHNICAL DRAWING EDUCATION: AN ASSESSMENT APPROACH	João R. Almeida, Camila S. Ferreira, Lucas M. Costa, Beatriz L. Oliveira
		8	AGRICULTURAL GOVERNANCE AND RURAL DEVELOPMENT IN KAZAKHSTAN	Prof. Dr. Aibek Nursultanov

ICSAS 4th INTERNATIONAL CONFERENCE ON EDUCATION March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 4	Prof. Dr. Kenji Yamamoto,	1	REVOLUTIONIZING TEACHING METHODS WITH ADVANCED DIGITAL SOLUTIONS	Ling Chen, Haruto Sato, Kwame Boateng
		2	IMPROVING ENGINEERING EDUCATION STANDARDS THROUGH QUALITY ASSURANCE AND SELF-ASSESSMENT	Wei Li, Yuki Nakamura,
		3	BOOSTING HISTORY EDUCATION WITH MULTIMEDIA TOOLS: A CROSS-CULTURAL ANALYSIS	Dr. Samuel Owusu, Dr. Grace Wambui, Dr. Amina Diallo
		4	TRANSFORMING SCIENCE EDUCATION: CUTTING-EDGE APPROACHES TO TEACHING NUCLEAR CONCEPTS	Lin Zhang, Ahmed El-Sayed
		5	EVALUATING MENTAL HEALTH SUPPORT FOR ENGINEERING STUDENTS: THE ROLE OF THERAPIST CHARACTERISTICS	Prof. Dr. Kenji Yamamoto,
		6	OVERCOMING CHALLENGES IN CONSTRUCTION MEASUREMENT EDUCATION	Jamal Mwangi
		7	CHANGING BEHAVIORS THROUGH EDUCATIONAL GAMES: A FOCUS ON ENVIRONMENTAL CONSCIOUSNESS	Sakura Yamamoto, Assoc. Prof. Dr. Ochieng Mwangi
		8	TRANSFORMING LEARNING THROUGH HYBRID EDUCATION: THE IMPACT OF DIGITAL TOOLS	Haruto Tanaka

ICSAS 4th INTERNATIONAL CONFERENCE ON EDUCATION March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 5	Dr. Aoi Yamamoto	1	ADVANCING ROBOTIC SYSTEMS EDUCATION THROUGH INNOVATIVE LEARNING METHODS: A CASE STUDY AT SHANGHAI INSTITUTE OF TECHNOLOGY, CHINA	Wang Lei, Sun Jing, Li Min
		2	INVESTIGATING UNDERGRADUATE STUDENTS' UNDERSTANDING OF MATHEMATICAL CONCEPTS IN RATE OF CHANGE	Haruto Suzuki, Dr. Aoi Yamamoto
		3	EXAMINING THE ROLE OF MATHEMATICAL CONFIDENCE, ENGAGEMENT, AND IDENTITY IN STUDENT ACHIEVEMENT	Wei Liu, Assis. Prof. Tunde Ojo
		4	REVOLUTIONIZING MEDICAL EDUCATION THROUGH AUGMENTED REALITY: A NEW FRONTIER IN EMBRYOLOGY TEACHING	Yuki Sato, Chen Li, Fatima Ali, Haruto Nakamura, Kwame Asante, Nurul Hasanah
		5	A STUDY OF CAREER GOALS AMONG FINAL-YEAR STUDENTS IN THE SCHOOL OF MEDICINE, UNIVERSITY OF LAGOS, NIGERIA	E. Okonkwo, F. Balogun, P. Eze, S. Ahmed, B. Okafor, T. Adeyemi, G. Oladipo, H. Suleiman
		6	IMPROVING EMPLOYEE PERFORMANCE ANALYSIS IN CORPORATE TRAINING USING XAPI: INSIGHTS INTO BEHAVIORAL TRENDS AND PREDICTIVE MODELING	Taro Suzuki, Fatima Ibrahim,
		7	EXPLORING ACTIVE LEARNING PRACTICES AMONG ONLINE GRADUATE STUDENTS: A CASE STUDY IN SOUTH ASIA	Yuki K. Sato, Sipho Dlamini
		8	BOOSTING ONLINE GRADUATE STUDENT PARTICIPATION THROUGH EFFECTIVE TEACHING STRATEGIES IN SOUTH ASIA	Assoc. Prof. Dr. Kwame O. Asante
		9	ASSESSING INTERACTIVE ENGAGEMENT IN BLENDED LEARNING SETTINGS: A FOCUS ON DATA SYNCHRONIZATION AND FEEDBACK LOOPS	Fatima Al-Hassan, Kwame Osei

ICSAS 4th INTERNATIONAL CONFERENCE ON EDUCATION March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 6	Assis. Prof. Dr. Aiko Nakamura	1	EMPOWERING PEDAGOGY STUDENTS WITH LEARNING DISABILITIES: CAREER PATHWAYS AND CHALLENGES IN THAILAND	Somchai Ratanakul Ananya Sirisom
		2	BOOSTING COMPUTATIONAL THINKING IN STEM EDUCATION THROUGH PHYSICAL COMPUTING INNOVATIONS	Dr. Maria Gonzalez
		3	FOSTERING CREATIVITY IN EARLY CHILDHOOD EDUCATION: THE IMPACT OF GRAPHIC ACTIVITIES IN ZAMBIA	Lindiwe Nkosi Tafadzwa Moyo
		4	TRANSFORMING TEACHER TRAINING WITH TECHNOLOGY-DRIVEN KNOWLEDGE BUILDING: INSIGHTS FROM SECONDARY EDUCATION	Kenji Yamamoto Amina Sani
		5	ASSESSING COGNITIVE LOAD IN PILOT TRAINING: A STUDY ON MODERN RECREATIONAL AIRCRAFT	Chinedu Okeke Youssef Ahmed
		6	INNOVATING STEM EDUCATION WITH NEUROCOGNITIVE LEARNING STRATEGIES	Assis. Prof. Dr. Aiko Nakamura
		7	ENHANCING METACOGNITIVE SKILLS THROUGH MOBILE LEARNING APPS: A STUDY ON HIGH-ACHIEVING STUDENTS	Assoc. Prof. Dr. Haruto Tanaka Sofia Martinez

ICSAS 4th INTERNATIONAL CONFERENCE ON EDUCATION March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 7	Dr. Sofia Martinez	1	ADOPTING EDUCATION 4.0 PRINCIPLES IN MODERN LANGUAGE TEACHING	Dr. Sofia Martinez
		2	THE IMPACT OF SOCIAL SKILLS AND COMMUNICATION TRAINING IN EARLY CHILDHOOD EDUCATION: PATHWAYS TO FUTURE SUCCESS	Mei Lin, Nadia Ahmed
		3	BUILDING INTERCULTURAL AWARENESS AMONG DIVERSE STUDENT GROUPS IN ISRAELI HIGHER EDUCATION	Rachel Cohen, David Levy
		4	IMPROVING MATHEMATICAL ABILITIES IN CHILDREN WITH AUTISM USING THE PROJECT MIND FRAMEWORK: A PRELIMINARY STUDY:	Dr. James Carter, Maria Gonzalez, Emma Wilson, Michael Brown, Olivia Davis
		5	REDESIGNING CLASSROOM SPACES: A COLLABORATIVE WORKSHOP WITH CHINESE DESIGN STUDENTS	P. J. Anderson, S. T. Nguyen,
		6	ASSESSING THE EFFECTIVENESS OF THE VARK LEARNING MODEL IN HIGHER EDUCATION SETTINGS	Assoc. Prof. Dr. Emma Harris, Dr. Daniel White
		7	BOOSTING STUDENT PARTICIPATION AND ACADEMIC PERFORMANCE THROUGH INTERACTIVE DIGITAL TOOLS	Fatoumata Diallo
		8	THE ROLE OF EDUCATIONAL MEDIA IN SHAPING THE CREATIVE DEVELOPMENT OF CHILDREN: A CASE STUDY ANALYSIS	Aiko Sato, Li Chen
		9	ADVANCING WRITING SKILLS THROUGH TARGETED TEACHING METHODS: LESSONS FROM A SOUTHEAST ASIAN PROGRAM:	K. Sato, J. Park, A. Ochieng, S. Lee

ICSAS 4th INTERNATIONAL CONFERENCE ON EDUCATION March 7 – 9, 2025 IZMIR Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:30 – 13:30 Time zone in Turkey (GMT+3)				
Salon	Moderator		Bildiri No ve Başlığı / Paper ID and Title	Authors
HALL / SALON 8	Assis. Prof. Dr. Olivia Carter	1	IMPROVING LANGUAGE SKILLS AND CROSS-CULTURAL AWARENESS: A PILOT INITIATIVE FOR UNIVERSITY STUDENTS FROM A TEACHER TRAINING COLLEGE IN ATEQUIZA, MEXICO	Dr. Sofia M. González, Dr. Carlos A. Martínez, Dr. Isabel T. López
		2	INVESTIGATING ACADEMIC STRESS LEVELS AMONG UNIVERSITY STUDENTS WITH DYSLEXIA	Assis. Prof. Dr. Olivia Carter
		3	REVOLUTIONIZING MEDICAL TRAINING IN BRAZIL THROUGH ADVANCED SIMULATION TECHNIQUES: KEY FINDINGS AND RECOMMENDATIONS	Dr. Ana J. Santos
		4	CURRICULUM REFORM IN CHILEAN UNIVERSITIES: A COMPREHENSIVE EXAMINATION OF POLICY CHANGES	Dr. Camila R. Fernández
		5	USING CHILDREN'S ARTWORK TO GAIN INSIGHTS INTO THEIR EXPERIENCES WITH EQUINE-ASSISTED THERAPY	Dr. Sophia Johnson
		6	THE EFFECTS OF COMMERCIALIZATION ON HIGHER EDUCATION: SHIFTING FOCUS IN TEACHING AND LEARNING PRIORITIES	Emma Thompson, Prof. Dr. Michael Richards
		7	THE ROLE OF COLLABORATIVE WORK ENVIRONMENTS IN SHAPING MIDDLE SCHOOL TEACHERS' PRACTICES	Olivia Carter
		8	EVALUATING THE USE OF CHATBOTS IN UNIVERSITY EDUCATION: FINDINGS FROM AN INITIAL PILOT STUDY	John Smith, L. Williams

ICSAS 2nd INTERNATIONAL CONFERENCE ON PHILOSOPHY March 7 - 9, 2025 İzmir Meeting ID: 885 7151 8350 Passcode: 202224 7 Mart / March 7, 2025 / 11:00 – 13:00 Time zone in Turkey (GMT+3)

ÖZET

Psikolojik dayanıklılık, bireylerin yaşamlarında karşılaştıkları zorlayıcı durumlarla başa çıkma kapasitesi olarak tanımlanmaktadır. Özel gereksinimli çocukların farklı gelişimsel ihtiyaçları, ebeveynler üzerinde hem bireysel hem de aile düzeyinde önemli bir baskı ve stres yaratmaktadır. Bu bağlamda, dayanıklılığı etkileyen faktörlerin risk ve koruyucu faktörler olarak sınıflandırılması, sürecin anlaşılmasını kolaylaştırmaktadır. Sosyal destek, kişisel özellikler, eğitim ve bilgi koruyucu faktörler arasında yer alırken; finansal zorluklar, sosyal izolasyon, kronik stres ve sürekli bakım sorumluluklarının yarattığı tükenmişlik gibi unsurlar risk faktörleri olarak tanımlanmaktadır.

Wallender ve Varni (1998), kronik sağlık sorunları olan çocukların ebeveynlerine yönelik bir dayanıklılık modeli geliştirmiştir. Olsson (2008), bu modeli özel gereksinimli çocukların ebeveynleri için uyarlayarak, özel gereksinimli bir çocuğa sahip olmanın ebeveynler için önemli bir stres kaynağı olduğunu belirtmiştir. Modelde çocuğun davranış problemleri ve ebeveynin algıladığı bakım yükü risk faktörleri olarak tanımlanırken; çocuğun prososyal davranışları ve ebeveyn-çocuk ilişkisi koruyucu faktörler arasında yer almaktadır. Ebeveyne özgü bireysel risk faktörleri arasında kişilik özellikleri ve başa çıkma becerileri bulunmakta, sosyal destek, formal destek ve psikoeğitim programlarına katılım ise koruyucu faktörler olarak değerlendirilmektedir.

Araştırmalar, ebeveynlerin dayanıklılığını artırmak amacıyla sosyal politikaların geliştirilmesi, müdahale programlarının yaygınlaştırılması ve toplumsal önyargıların azaltılmasına yönelik çalışmaların kritik bir rol oynadığını göstermektedir. Bu çalışma, özel gereksinimli çocukların ebeveynlerinin psikolojik dayanıklılığını artırmaya yönelik stratejik ve sürdürülebilir müdahale programlarının geliştirilmesine katkı sağlamayı amaçlamaktadır.

Anahtar kelimeler: ebeveyn, psikolojik dayanıklılık, risk faktörleri, koruyucu faktörler, özel gereksinimli çocuk

AN INVESTIGATION OF THE FACTORS AFFECTING THE RESILIENCE OF PARENTS OF CHILDREN WITH SPECIAL NEEDS

Psychological resilience is defined as an individual's capacity to cope with challenging life situations. The diverse developmental needs of children with special needs impose significant pressure and stress on their parents, affecting both individual and family dynamics. In this context, classifying the factors influencing resilience into risk and protective factors facilitates a clearer understanding of the process. Protective factors include social support, personal characteristics, education, and knowledge, while financial difficulties, social isolation, chronic stress, and caregiver burnout are identified as risk factors.

Wallender and Varni (1998) developed a resilience model for parents of children with chronic health conditions. Olsson (2008) adapted this model for parents of children with special needs, emphasizing that having a child with special needs constitutes a major source of stress for parents. In this model, the child's behavioral problems and the perceived caregiving burden are categorized as risk factors, whereas the child's prosocial behaviors and the quality of the parent-child relationship are considered protective factors. Individual risk factors specific to parents include personality traits and coping skills, while social support, formal support, and participation in psychoeducation programs are recognized as protective factors.

Research indicates that the development of social policies to strengthen parental resilience, the expansion of intervention programs, and initiatives aimed at reducing societal prejudices play a critical role in enhancing psychological resilience. This study aims to contribute to the development of strategic and sustainable intervention programs designed to enhance the psychological resilience of parents of children with special needs.

Keywords: parent, psychological resilience, risk factors, protective factors, child with special needs

REFLECTIONS OF ROMANTIC RELATIONSHIP BELIEFS AND MARITAL ROLE EXPECTATIONS ON LIFE SATISFACTION

This study examines the effects of marital role expectations and the irrational romantic relationship beliefs on life satisfaction of individuals. The study included 401 participants, 59.35% of whom were male ($n = 238$) and 40.65% were female ($n = 163$). In terms of age groups, 62.16% of the participants were aged 0-25, 35.34% were aged 26-45, and 2.51% were aged 46 and over. The sample was determined via the convenience sampling method, and data were collected online. The data collection tools in the study were the Marital Role Expectations Scale (MRS), Life Satisfaction Scale (LSS), and Irrational Romantic Relationship Beliefs Inventory (RIRP). Data analysis was performed using SPSS 25 package program and Pearson Correlation Analysis was employed to determine the relationships among variables. Multiple Regression Analysis was used to examine the predictive power of variables on life satisfaction. According to the correlation analysis, a positive significant relationship was found between irrational romantic relationship beliefs and life satisfaction ($r = 0.297$, $p < 0.001$). These findings show that the individuals' beliefs on their romantic relationships may increase their life satisfaction. On the other hand, the relationship between marital role expectations and life satisfaction was found to be weak ($r = 0.220$, $p < 0.001$). Multiple regression analysis results showed that marital role expectations and irrational romantic relationship beliefs explained 9.85% of all life satisfaction. It was determined that beliefs about romantic relationships had a strong relationship with life satisfaction compared to marital role expectations. The findings of the study reveal that individuals' beliefs about marriage and romantic relationships can have a significant impact on their life satisfaction and provide important information in understanding how these expectations shape individuals' relationship dynamics.

Key Words:

Irrational Romantic Relationship Beliefs, Marital Role Expectations, Life Satisfaction.

INTRODUCTION

Romantic relationships and marriage are among the basic elements that affect individuals' life satisfaction. The beliefs of individuals in romantic relationships and the roles that they expect to undertake in marriage can shape their general life satisfaction. In this context, irrational beliefs in romantic relationships and expectations of marriage may have significant effects on individuals' life satisfaction. The relationship between marital role expectations, romantic beliefs, and life satisfaction has been the subject of extensive research since the initial years of marital therapy. Marital role expectations mean the expectations of individuals about the roles and responsibilities in which they intend to undertake in marriage. These expectations can be classified as traditional or egalitarian approaches. In a study conducted by Tosun and Yazıcı (2021), it was found that perceived parental relationship attitudes and irrational beliefs in romantic relationships explained their expectations of marriage significantly. It was observed that the authoritarian father's attitude increases traditional role expectations and the attitude of the democratic mother supports the expectations of egalitarian role.

Early studies on marital satisfaction largely focused on the impact of traditional gender roles and expectations within marriage which are shaped by the society. Marital roles which can be named as the behavioral expectations and divisions of labor for husbands and wives rooted in societal norms of a particular society at any given time. These roles, often rooted in societal norms, dictate how individuals should behave within a marital relationship, influencing several significant issues in marriage such as how spouses allocate emotional, financial, and domestic responsibilities (Baucom & Epstein, 1990). Research has shown that firm devotion to traditional marital roles, especially socially imposed gender expectations of caregiving and financial provision, can lead to dissatisfaction in modern marriages, particularly when one partner feels burdened by unequal distribution of responsibilities or have to struggle against the power struggles that are imposed by these gender roles (Lammers et al., 2011; Lease, 2003). Besides societal norms, marital role expectations of each partner are outlined by each individuals' family of origins via social learning and role modelling their marital relationship patterns (Cui & Fincham, 2010). Owing to the changes in woman's status within the society and marriage such as having the opportunity to have an access to education and possibility to have an occupation, traditional gender roles which were strict and more demanding for woman have turned into more liberated and equal form on the behalf of the women (Lease, 2003). As marriage dynamics continue to evolve in time, researchers have shifted focus toward examining the flexibility of these roles and how expectations around them influence emotional well-being and life satisfaction of partners within marital relationship.

Romantic beliefs, or the idealized views individuals hold about love, relationships and their partners, are another key factor influencing and shaping marital satisfaction. Central to this body of work is the concept of "romanticism," which refers to the belief in love as a perfect, all-encompassing force that should meet all emotional and relational needs (Huston et al., 2001). Studies have indicated that individuals with highly romantic beliefs often experience greater initial relationship satisfaction but are more likely to be disappointed or disillusioned when their expectations do not align with reality (Fletcher et al., 1999). Research by Sprecher (2001) demonstrated that when individuals' romantic ideals clash with the realities of marriage—such as financial stress, unmet emotional needs, or unbalanced roles—overall life

satisfaction tends to decrease. Conversely, a more realistic understanding of romantic relationships, one grounded in mutual respect and understanding rather than idealization, is associated with greater long-term marital satisfaction (Lammers et al., 2011). Irrational beliefs express unrealistic and irrational thought patterns of individuals. Irrational relationship beliefs are defined as irrational beliefs that resist change regarding the individual and the nature of the relationship, and they cause problems in relationships (Ellis, 1986). In the context of romantic relationships, such beliefs, excessive expectations from the partner, intolerance to different thoughts or strict views on gender roles. In a study conducted by Sarı and Korkut Owen (2016), it was found that irrational beliefs in romantic relations adversely affect the relationship satisfaction. In particular, the increase in beliefs in the sub-dimension of "gender differences" reduces relationship satisfaction.

In addition, recent studies have investigated the intersection of marital role expectations and romantic beliefs. Ahlborg and his colleagues (2005) found that individuals with traditional marital role expectations tend to hold more idealized romantic beliefs, which can lead to dissatisfaction if their marital realities do not meet these ideals. This mismatch between expectations and reality can be particularly pronounced for women, who may experience a heightened sense of disillusionment when they are unable to fulfil both the nurturing and career-focused roles simultaneously. Furthermore, research by Weitzman (2014) suggests that couples who share more egalitarian views about marital roles and romantic beliefs tend to report higher life satisfaction, as they are better able to negotiate responsibilities and align their emotional needs within the marriage.

Life satisfaction refers to the level of satisfaction that an individual feels about his/her life in general. Irrational beliefs in romantic relationships and marital role expectations can directly affect individuals' life satisfaction. In a study conducted by Kaya and Yüceol (2018), it was found that gender role attitudes and irrational beliefs in romantic relationships have significant effects on relationship satisfaction. Traditional gender role attitudes and high levels of irrational beliefs can reduce relationship satisfaction. While marital role expectations and romantic beliefs are critical to understanding life satisfaction, recent studies have also emphasized the role of communication and conflict resolution in mediating their effects. Conflict resolution strategies, such as compromise and open communication, have been found to buffer the negative effects of unmet marital expectations and unrealistic romantic beliefs (Gottman, 1994). Couples who actively negotiate and adjust their expectations—whether in terms of gender roles or romantic ideals—experience higher levels of relational and personal well-being. Moreover, the flexibility in one's expectations, alongside an evolving understanding of romance that accommodates imperfections, has been shown to enhance both marital satisfaction and individual life satisfaction (Bodenmann et al., 2007).

In conclusion, the existing literature highlights the complex relationship between marital role expectations, romantic beliefs, and life satisfaction. Both marital role expectations and romantic ideals significantly shape individuals' experiences within marriage, with a mismatch between expectations and reality contributing to dissatisfaction. However, flexibility in these expectations, along with realistic romantic beliefs and effective communication, can mitigate

potential negative outcomes and improve overall life satisfaction. Further research is needed to explore how these factors interact across different cultural contexts and relationship stages, as well as how evolving gender norms continue to reshape marital satisfaction in contemporary society.

Method

Study Group

The sample of the study consists of a total of 401 participants. 59.35% of the participants are male (n = 238) and 40.65% are female (n = 163). With regard to age groups, 62.16% of the participants are in the 0-25 age group, 35.34% in the 26-45 age group, and 2.51% in the 46+ age group. Convenient sampling method was used to determine the study group.

The data includes variables such as age, gender, education level, family type, number of siblings, birth order, accommodation, income status, relationship status, perception of the most appropriate age for marriage, and marriage preference.

2. Analysis of Demographic Variables

Figure 1. Demographic Variables

Variable	Category	Frequency	Percentage (%)
Gender	Male	238	59.35
	Female	163	40.65
Age	18-25	248	62.16
	26-45	141	35.34
	46 +	10	2.51
Education Level	Bachelor's Degree	212	52.87
	High School	97	24.19
	Postgraduate	37	9.23
Family Type	Nuclear Family	280	69.83
	Extended Family	121	30.17
Accommodation	City	190	47.38
	District	131	32.67
	Village/Town	80	19.95

Income Status	Middle (moderate) Income	225	56.11
	Low Income	98	24.44
	High Income	78	19.45
Relationship Status	Within Relationship	174	43.39
	No Relationship	227	56.61
Marriage Preference	Romantic Marriage	253	63.09
	Traditional Marriage	148	36.91

Demographic analysis presents that the participants are largely young, educated and living in city centres.

59.35 % of the participants are male and 40.65 % are female and men have a higher proportion. 62.16% of the individuals participating in the study are 0-25 years, 35.34 % are between 26-45 years and 2.51% in the 46+ age group. In terms of education status, 52.87 % of them were undergraduates (BA degree), 24.19 % were high school graduates and 9.23 % of them received post graduate degree. 69.83 % grew up in a nuclear family and the remaining 30.17 % grew up in an extended family. In terms of accommodation, 47.38 % of the participants grew up in metropolitan cities, 32.67 % in districts and 19.95% in villages/towns. In terms of income status, 56.11 % is at moderate income level, 24.44 % is at low-income level and 19.45 % are at high income level. 56.61 % of the participants stated that they do not have any relationship at the moment. With regard to marital preferences, 63.09 % prefer romantic marriage and 36.91 % prefer traditional marriage.

Data Collection Tools

The Marital Role Expectations Scale (MRS)

In this study, the Marital Role Expectations Scale (MRS) was used to assess individuals' role expectations regarding marriage. MRS was developed by Köksal and İlhan (2018) and is a valid and reliable measurement tool for measuring traditional and egalitarian role expectations in marriage.

During the scale development process, a 93-item item pool was created by taking into account interviews with married and single individuals, literature reviews, and previously developed measurement tools. As a result of the exploratory factor analysis, a two-factor structure explaining 36.25% of the total variance was obtained. These factors were named as Traditional Role Expectations and Egalitarian Role Expectations. The scale consisted of 40 items and was in a Likert-type 5-point scale format.

Within the scope of validity studies of the scale, criterion validity was examined with Relational-Individualistic-Collectivistic Self Scale (RIS) and Bem Gender Role Inventory (BCI) and it was determined that ERBS showed significant relationships with these scales. Confirmatory factor analysis (CFA) results showed that the model had a good fit ($\chi^2/sd = 2.01$, CFI = .96, RMSEA = .061, SRMR = .074).

Internal consistency and test-retest analyses were conducted within the scope of the reliability studies of the scale. Cronbach's alpha coefficients were calculated as .92 - .93 for the Traditional Role Expectations subscale and .87 - .88 for the Egalitarian Role Expectations subscale. Test-retest reliability was found as .66 and .95, respectively, as a result of the application carried out two weeks apart.

As a result of these findings, it can be said that the Marital Role Expectations Scale (MRO) is a valid and reliable tool for assessing individuals' role expectations within marriage (Köksal & İlhan, 2018).

Life Satisfaction Scale (LSS)

In this study, the Life Satisfaction Scale (LSS) was used to assess individuals' life satisfaction. LSS was developed by Diener, Emmons, Larsen, and Griffin (1985) and is a valid and reliable measurement tool for measuring individuals' general life satisfaction.

The original form of the scale was in English and consists of a total of 5 items under a single-factor structure. The adaptation of the scale to Turkish was carried out by Köker (1991) and, Dağlı and Baysal (2016). In the adaptation process, the scale was first translated into Turkish and then, linguistic equivalence was achieved by applying the back translation method. A linguistic equivalence study was conducted with 21 English teachers working in Diyarbakır province, and a high-level positive and significant relationship was found between the English and Turkish forms of the scale ($r = 0.92$, $p < 0.001$).

The LSS is a 5-point Likert-type scale format, with responses ranging from "Strongly Disagree (1)" to "Strongly Agree (5)". Scale items are intended to measure the individual's level of life satisfaction.

Within the scope of validity studies, the construct validity of the scale was examined with exploratory and confirmatory factor analyses, the Kaiser-Meyer-Olkin (KMO) coefficient was determined as 0.869, the Bartlett sphericity test result was $\chi^2 = 528.329$, $p < 0.001$. The total variance explained was 68.38%, supporting the single-factor structure of the scale.

With regard to reliability studies, the internal consistency of the scale was evaluated with Cronbach Alpha coefficient and was calculated as 0.88. In addition, test-retest reliability was examined and the correlation between the applications made two weeks apart was found to be $r = 0.97, p < 0.001$.

These findings show that the Life Satisfaction Scale (LSS) is considered a valid and reliable tool to measure individuals' life satisfaction (Dağlı & Baysal, 2016).

Irrational Beliefs in Romantic Relations Inventory (IRBI)

In this study, Irrational Beliefs in Romantic Relations Scale (IRBI) used to evaluate the irrational beliefs of individuals in romantic relationships. The scale was developed by Sarı and Korkut Owen (2015) and has a 30 -item, 6 -factor structure to determine dysfunctional beliefs that individuals have in romantic relationships

IRBI was developed based on cognitive distortion and irrational thought theories initiated by Ellis (1986) and Beck (2001) . Initially, the scale, which consisted of 98 items, was reduced to 30 items as a result of the explanatory factor analysis (EFA) and was shaped as a Likert -type 5 -degree structure. Participants evaluate the scale items between "absolutely disagree (1)" and "I absolutely agree (5)". As a result of the factor analysis of the scale, six factors explaining 51.70 % of the total variance were obtained. These factors include: Over Expectations (8 items), Use of Social Time (6 items), Mind Reading (6 items), Different Thinking (4 Articles), Physical Intimacy (3 Articles), Gender Differences (3 Articles)

Within the scope of the validity studies, the structure validity of the scale was examined by opening and confirmatory factor analyzes. Confirmatory Factor Analysis (DFA) results showed that the model adapted well (RMSEA = 0.06, GFI = 0.88, AGFI = 0.86, CFI = 0.91, NNFI = 0.90, SRMR = 0.06).

In terms of reliability, the internal consistency reliability of the scale was evaluated with the Cronbach Alpha coefficient and it was found 0.85 for the total scale while it was ranging from 0.53 to 0.81 for the subdimension. Moreover, test-retest reliability was examined and as a result of the applications performed with a three-month interim, the total score of the scale was $R = 0.85$ and it was found that the values ranging from $R = 0.53$ to 0.82 for subscales.

In line with these findings, Irrational Beliefs in Romantic Relations Inventory (IRBI) is accepted as a valid and reliable tool for evaluating dysfunctional beliefs that individuals have about romantic relations (Sarı & Korkut Owen, 2015) .

Procedure

In this study, the effects of individuals' irrational romantic beliefs and marital role expectations within romantic relationships on life satisfaction were examined. Within the scope of the study, 401 participants were included in the study, 59.35 % of these individuals consisted of male ($n = 238$) and 40.65 % of them are female ($n = 163$) individuals. Participants are distributed to be 0-

25 years of age, 35.34 % of them are 26-45 years of age and 2.51 % of them are 46 years and older than the age groups.

Before the data collection process, participants were informed about the purpose of the study and voluntary participation was provided. The scales were filled by the participants in online (online) platforms and completed in an average of 15-20 minutes. The data was collected anonymously in accordance with the privacy rights and ethical principles of the participants.

Data Analysis

The data obtained in the research were analyzed using SPSS 25 package program. In order to examine the relationships between variables, Pearson Moments multiplication correlation analysis was applied, and the ability of the variables was tested by multiple regression analysis.

Findings

In this section, research findings are included. Initially, the relationship between variables (marital role expectations, irrational beliefs in romantic relations and life satisfaction) was examined, and then regression analysis was carried out to find the predictive power of the marital role expectations and irrational beliefs in romantic relationships over all life satisfaction. The descriptive statistics of the variables discussed in the study are presented in Table 2.

Table 2. Descriptive Statistics of the scores obtained from variables.

N	Minimum	Maximum	Mean	Standard Deviation
401.0	40.0	200.0	143.21	24.34
401.0	42.0	142.0	100.75	18.91
401.0	5.0	25.0	15.97	5.15

Descriptive statistics provide basic information about the variables used in the research. Minimum, maximum, mean and standard deviation values obtained from the variables of life

satisfaction, marital role expectations and irrational beliefs in romantic relationships variables enable us to understand the general tendencies of the participants.

Considering the average ($M = 15.97$, $SD = 5.15$) of the life satisfaction variable, the life satisfaction levels of the participants are found to be in moderate level. However, the range between the minimum and maximum values (5-25) shows that there are significant differences in life satisfaction levels of individuals .

The mean ($M = 143.21$, $SD = 24.34$) obtained for the variable of marital role expectations ($M = 143.21$, $SD = 24.34$) shows that the marital expectations of the participants are high in general. However, the relatively high standard deviation value indicates that there are significant differences between individuals in terms of these expectations .

The average value for irrational beliefs in romantic relationships ($M = 100.75$, $SD = 18.91$) shows that the participants have some irrational beliefs about romantic relationships. The relatively wide range of standard deviation suggests that some individuals adopt such beliefs more strongly and that some individuals have lower levels of irrational beliefs.

Table 3. Pearson Correlation Analysis Results

	Marital Role Expectations	Irrational Beliefs in Romantic Relationships	Life Satisfaction
Marital Role Expectations	1.0	0.439	0.22
Irrational Beliefs in Romantic Relationships	0.439	1.0	0.297
Life Satisfaction	0.22	0.297	1.0

There was a positive and significant relationship between irrational beliefs in romantic relationships and life satisfaction ($r = 0.297, p < 0.001$). This finding shows that individuals' positive or idealized beliefs in romantic relationships can increase their overall life satisfaction. It can be uttered that the individuals with positive expectations in terms of romantic relationships may have higher level of overall life satisfaction.

It was found that there is a slight relationship between marital role expectations and life satisfaction level ($r = 0.220, p < 0.001$). This result shows that individuals' marital expectations affect the individuals' life satisfaction in a more limited way when compared to the effect of romantic beliefs. than in beliefs in romantic relationships. In other words, the effect of individuals' marital expectations on life satisfaction is relatively lower than that of romantic beliefs.

A moderate correlation was found between the marital expectations and irrational beliefs in romantic relationships ($r = 0.439, p < 0.001$). This finding shows that individuals' expectations about marriage may be related to their beliefs in romantic relationships. It can be claimed that individuals with traditional or idealized marriage expectations tend to have higher irrational or idealized beliefs in romantic relationships.

Overall, beliefs in romantic relationships have a stronger relationship with overall life satisfaction compared to marital role expectations. These findings show that individuals' expectations from relationships and marriage can be effective over life satisfaction at different degrees.

Table 4. Multiple Regression Analysis Results

Variables	R	R ²	Adjusted R ²	F Value	Beta	t value	Tolerance	VIF
Stable	0.0985	0.0985	0.0939	21.7338	5.7747	3.5138	0.0222	45.07
Marital Role Expectations	0.0985	0.0985	0.0939	21.7338	0.0235	2.0993	0.8071	1.2389

Irrational Beliefs in Romantic Relationships	0.0985	0.0985	0.0939	21.7338	0.0677	4.693	0.8071	1.2389
--	--------	--------	--------	---------	--------	-------	--------	--------

As shown in Table 4, the Variance Inflation Factor (VIF) value, which are the statistical values obtained to test the assumptions of the multiple regression analysis, was calculated as 15.85 and the tolerance value was 0.55.

The VIF value is used to determine the level of multicollinearity between independent variables. A high VIF value such as 15.85 indicates that there is a strong relationship between independent variables, but a tolerance value of 0.55 indicates that the variables can be used in the model. The tolerance value not falling below 0.10 reveals that the model does not have a serious multicollinearity problem.

When the explanatory power of the model is examined, it is seen that the marital role expectations variable explains 9.85% of the total variance of the dependent variable, life satisfaction. This shows that the effect of marital role expectations on individuals' life satisfaction is low to moderate.

However, the fact that the model was significant and the effect of the marital role expectations variable on overall life satisfaction was statistically significant suggests that this variable may be an important factor in terms of individuals' life satisfaction. Although the explanatory power of the model is below 10%, it can be said that marital role expectations have a significant effect on individuals' general life satisfaction.

These findings provide significant data in understanding that individuals' expectations about marriage and romantic relationships can be an important factor in their overall life satisfaction and how these expectations shape the individual's relationship dynamics. Irrational beliefs in romantic relationships were found to contribute 0.45% to this dimension, explaining 9.39% of the total life satisfaction level.

As a result, the multi-stage regression analysis shows that the established model is statistically significant ($R = 0.098$, $F(2,00) = 21.734$, $p < 0.001$).

Discussion and Conclusion

Research findings show that irrational beliefs and marital role expectations in romantic relationships have significant effects on individuals' life satisfaction. Irrational beliefs, especially strict beliefs about gender differences, are seen to negatively affect relationship satisfaction and thus, reduce overall life satisfaction. Parallel to these findings, several studies suggest that people who have problems in their intimate relationships develop dysfunctional beliefs about their relationships (Stackert & Bursik, 2003). These irrational beliefs can lead to a significant negative impacts on their relationships and end in individuals' suppressing their

own needs and desires and giving priority to their partners' needs, which means a dissatisfactory marital relationship and low level of life satisfaction. This situation shows that individuals being more flexible and understanding in their relationships can increase their life satisfaction. In terms of marital role expectations, it is seen that traditional role expectations have a weaker effect on life satisfaction, while egalitarian role expectations increase life satisfaction. This finding shows that adopting an egalitarian approach in marriage can positively affect individuals' overall life satisfaction. As marriage dynamics continue to evolve, scholars have shifted focus toward examining the flexibility of these roles and how expectations around them influence emotional well-being and life satisfaction.

As a result, this study examined the effects of irrational beliefs and marital role expectations on individuals' life satisfaction in romantic relationships. The results show that irrational beliefs and traditional marital role expectations negatively affect life satisfaction. In particular, rigid beliefs about gender differences and traditional role expectations reduce relationship and life satisfaction. Therefore, individuals adopting a more flexible, understanding, and egalitarian approach in their relationships may be beneficial in increasing their life satisfaction.

ÖZET

Bu araştırmada ikili ilişkilerde mükemmeliyetçilik, romantik ilişkilerde akılcı olmayan inançlar ve psikolojik iyi oluş ile evlilik uyumu arasındaki ilişkinin incelenmesi amaçlanmıştır. Bununla birlikte evlilik uyumu ile cinsiyet, çalışma durumu, eğitim durumu, evlilik süresi ve çocuk sayısı değişkenleri arasında anlamlı bir fark olup olmadığı incelenmiştir. Araştırmaya 2024 Mart-2025 Ocak arası farklı şehirlerde ikamet eden 322 evli birey (175 kadın, 147 erkek) katılmıştır. Veri toplama aracı olarak 'Kişisel Bilgi Formu', 'İkili İlişkilerde Olumlu Olumsuz Mükemmeliyetçilik Ölçeği', 'Romantik İlişkilerde Akılcı Olmayan İnançlar Ölçeği', 'Psikolojik İyi Oluş Ölçeği' ve 'Evlilik Uyumu Ölçeği' kullanılmıştır. Verilerin analizi, bağımsız gruplar t-testi, tek yönlü varyans analizi (ANOVA), pearson korelasyon analizi ve çoklu doğrusal regresyon analizi gerçekleştirilmiştir. Yapılan analizler sonucunda evli bireylerin evlilik uyumlarının evlilik süresi ve çocuk sayısına göre istatistiksel olarak anlamlı bir farklılık gösterirken cinsiyet, çalışma durumu ve eğitim durumuna göre ise istatistiksel olarak anlamlı bir fark göstermediği bulunmuştur. Çoklu regresyon analizi sonuçlarına göre ikili ilişkilerde mükemmeliyetçiliğin farklılık alt boyutunun negatif yönde ve psikolojik iyi oluşun pozitif yönde anlamlı olarak evlilik uyumunu yordadığı saptanmıştır.

Anahtar Kelimeler: ikili ilişkilerde mükemmeliyetçilik, romantik ilişkilerde akılcı olmayan inançlar, psikolojik iyi oluş, evlilik uyumu.

ABSTRACT

In this study, it was aimed to examine the relationship between perfectionism in dyadic relationships, irrational beliefs in romantic relationships, psychological well-being and marital adjustment. In addition, it was examined whether there was a significant difference between marital adjustment and the variables of gender, employment status, educational status, duration of marriage and number of children. Between March 2024 and January 2025, 322 married individuals (175 women, 147 men) living in different cities participated in the study. 'Personal Information Form', 'Positive Negative Perfectionism Scale in Dual Relationships', 'Irrational Beliefs in Romantic Relationships Scale', 'Psychological Well-Being Scale' and 'Marital Adjustment Scale' were used as data collection tools. Data were analyzed using independent samples t-test, one-way analysis of variance (ANOVA), Pearson correlation analysis and multiple linear regression analysis. As a result of the analyses, it was found that marital adjustment of married individuals showed a statistically significant difference according to the duration of marriage and number of children, while it did not show a statistically significant difference according to gender, employment status and educational status. According to the results of multiple regression analyses, it was found that the difference sub-dimension of perfectionism in dyadic relationships predicted marital adjustment negatively and psychological well-being predicted marital adjustment positively.

Keywords: perfectionism in relationships, irrational beliefs in romantic relationships, psychological well-being, marital adjustment.

ÖZET

Bu araştırma kapsamında araştırmaya katılan bireylerin romantik ilişki veya evlilik ilişkilerine yönelik karar verme becerisinin cinsiyet, yaş, medeni durum, çocuk sahibi olup olmama durumu, ilişki süresi değişkenlerine göre anlamlı bir fark olup olmadığı incelenmiştir. Araştırma grubu, Türkiye’de yaşayan 18-60 yaş arası romantik ilişkisi olan veya evli olan toplam 416 bireyden oluşmaktadır. Araştırmada, “Kişisel Bilgi Formu”, “İlişkide Karar Verme Ölçeği” kullanılmıştır. Katılımcıların ilişkide karar verme becerisinin cinsiyet, medeni durum ve çocuk sahibi olup olmama durumuna göre anlamlı farklılığı olup olmadığını incelemek için bağımsız gruplar t testi yapılmıştır. Yaş ve ilişki süresi değişkenlerine göre anlamlı farklılığı test etmek için tek yönlü varyans analizi (ANOVA) yapılmıştır. Yapılan analizler sonucunda bireylerin ilişkide karar verme becerisinde medeni durum, çocuk sahibi olup olmama ve ilişki süresi değişkenleri açısından anlamlı düzeyde farklılık bulunmuştur. Romantik ilişkisi olan bireylerin evli bireylere göre ilişkide karar verme becerisi anlamlı şekilde daha yüksek bulunmuştur. Çocuk sahibi olmayan bireylerin çocuk sahibi olanlara göre ilişkide karar verme becerisi anlamlı şekilde daha yüksek bulunmuştur. İlişki süresine göre 1-3 yıl arası romantik ilişkisi olan grubun 3 yıl ve üzeri olan gruba göre ilişkide karar verme becerisi anlamlı şekilde daha yüksek bulunmuştur. 3-7 yıl arasında ilişki süresine sahip evli bireylerin 7 yıl ve üzeri olan gruba göre ilişkide karar verme becerisi anlamlı şekilde daha yüksek bulunmuştur. Bireylerin ilişkide karar verme becerisinde cinsiyet ve yaş değişkenine göre anlamlı farklılık bulunmamıştır.

Anahtar Kelimeler: Romantik İlişki, Evlilik İlişkisi, İlişkide Karar Verme

ÖZET

Bu araştırmanın amacı, yetişkinlerin ilişki doyumu düzeylerinde cinsiyet, medeni durum, yaş, eğitim durumu, çalışma durumu ve algılanan ekonomik durum değişkenlerine göre anlamlı bir fark olup olmadığını incelemektir. Araştırma grubu, Türkiye'de yaşayan 18 ile 66 yaş arası 411 nişanlı veya evli bireylerden oluşmaktadır. Araştırmada, "Kişisel Bilgi Formu" ve "İlişki Doyum Ölçeği" kullanılmıştır. Katılımcıların ilişki doyumlarının cinsiyet, medeni durum değişkenlerine göre anlamlı farklılığı olup olmadığını belirlemek amacıyla bağımsız gruplar t-testi yapılmıştır. Bireylerin ilişki doyumlarının yaş, eğitim düzeyi, çalışma durumları ve algılanan ekonomik durum değişkenlerine göre anlamlı farklılığı olup olmadığını belirlemek amacıyla tek yönlü varyans analizi (ANOVA) yapılmıştır. Yapılan analizler sonucunda katılımcıların ilişki doyumlarında cinsiyet, medeni durum, eğitim durumu değişkenlerinde anlamlı düzeyde farklılık bulunmuştur. Cinsiyete değişkenine göre kadınların ilişki doyumu düzeylerinin erkeklere göre istatistiksel olarak anlamlı düzeyde daha yüksek; medeni durum değişkenine göre evlilerin ilişki doyumu düzeylerinin nişanlılara göre istatistiksel olarak anlamlı düzeyde daha yüksek; eğitim durumu değişkenine göre lisansüstü mezunu bireylerin ilişki doyumu düzeyleri lisans mezunu bireylerin ilişki doyumu düzeylerine göre istatistiksel olarak daha yüksek bulunmuştur. Bireylerin ilişki doyum düzeylerinde ise yaş, çalışma durumu ve algılanan ekonomik düzey değişkenlerine göre anlamlı farklılık bulunmamıştır.

Anahtar Kelimeler: İlişki, İlişki Doyumu, Cinsiyet, Yaş, Medeni Durum, Eğitim Durumu, Algılanan Ekonomik Düzey, Çalışma Durumu

*Bu çalışma Doç. Dr. Seher Merve Erus'un tez danışmanlığında Burçin Hazal Ağca'nın yüksek lisans tezinin bir kısmından üretilmiştir.

**ANALYZING SUCCESS FACTORS OF PLAY-BASED INTERVENTION
PROGRAMS FOR CHILDREN WITH DIFFERENT ABILITIES IN TURKEY: A
COMPARATIVE EVALUATION**

Aylin Yılmaz, Ahmet K. Yıldız, Dr. Öğr. Üyesi Zeynep Şahin

Aylin Yılmaz – Ankara University, Turkey (ORCID: 0000-0002-1234-5678)

Ahmet K. Yıldız – İstanbul University, Turkey (ORCID: 0000-0001-2345-6789)

Zeynep Şahin – Hacettepe University, Turkey (ORCID: 0000-0003-3456-7890)

Abstract:

This study explores the key success factors of play-based intervention programs for children with different abilities in Turkey. Children with disabilities often experience barriers to participation in play and physical activities, which can lead to negative impacts on their health and development. Understanding which aspects of these intervention programs lead to successful outcomes is critical for supporting their comprehensive development. A comparative evaluation approach was adopted, focusing on three similar successful intervention programs identified through purposive sampling. Data were gathered using interviews and program documents, with 40 participants purposefully selected for the study. Thematic analysis was applied to identify central themes such as Program Quality, Meeting Participants' Needs, and Insights from Experts and Practitioners. These intervention programs are crucial in filling the gap in community-based programs for children with different abilities. The findings of this research will contribute to the broader application of success factors derived from the best practices of play-based intervention programs for children with diverse abilities.

Keywords: Children with different abilities, physical activity, play, play-based intervention programs.

OYUN TEMELLİ MÜDAHALE PROGRAMLARININ FARKLI YETENEKLERİ OLAN ÇOCUKLAR İÇİN BAŞARI FAKTÖRLERİNİN ANALİZİ: KARŞILAŞTIRMALI BİR DEĞERLENDİRME

Özet:

Bu çalışma, Türkiye’de farklı yeteneklere sahip çocuklar için oyun temelli müdahale programlarının başarı faktörlerini analiz etmeyi amaçlamaktadır. Engelli çocuklar, oyun ve fiziksel aktivitelerde sınırlı katılım gösterdiklerinde, bu durum sağlıkları ve gelişimleri üzerinde olumsuz etkiler yaratabilir. Bu müdahale programlarının başarılı sonuçlara ulaşmasında hangi özelliklerin etkili olduğunu anlamak, çocukların bütünsel gelişimini desteklemek için kritik öneme sahiptir. Karşılaştırmalı bir değerlendirme yaklaşımı benimsenmiş ve amaçlı örnekleme ile üç benzer başarılı müdahale programı seçilmiştir. Veriler, görüşmeler ve program belgeleri aracılığıyla toplanmış olup, 40 katılımcı özenle seçilmiştir. Tematik analiz ile Program Kalitesi, Katılımcı İhtiyaçlarını Karşılama ve Uzmanlar ile Uygulayıcılardan Alınan Dersler gibi ana temalar belirlenmiştir. Bu programlar, farklı yeteneklere sahip çocuklar için toplum temelli programlardaki boşluğu doldurmada önemli bir rol oynamaktadır. Bu araştırmanın sonuçları, oyun temelli müdahale programlarında elde edilen başarı faktörlerinin daha geniş bir şekilde uygulanmasına katkı sağlayacaktır.

Anahtar Kelimeler: Farklı yeteneklere sahip çocuklar, fiziksel aktivite, oyun, oyun temelli müdahale programları.

THE SOCIAL DYNAMICS OF PANDEMICS: A CLINICAL SOCIOLOGICAL ANALYSIS OF PRECAUTIONS AND RISKS

Dr. Musa Karabulut

Hacettepe University, Turkey - ORCID: 0000-0002-3456-7890

Mustafa Eryılmaz

İstanbul University, Turkey - ORCID: 0000-0003-9876-5432

Abstract:

The COVID-19 pandemic has exposed the intricate relationship between social structures and public health, underlining the necessity of a comprehensive approach to pandemic responses. This research applies a clinical sociological framework to examine the social consequences of pandemics, particularly focusing on how social factors such as income, education, ethnicity, and geographic location contribute to vulnerability and resilience. The study emphasizes the significant role of risk perception, communication strategies, and community interactions in influencing the public's compliance with precautionary measures like mask-wearing, social distancing, and vaccination. By investigating how social norms, structural inequalities, and trust in institutions shape public behavior, this study sheds light on the challenges of managing health crises in diverse societies. Comparative case studies and policy analyses are used to compare pandemic responses across various nations and regions, highlighting the need for coordinated strategies and community-driven interventions. The results highlight that an effective pandemic response requires addressing fundamental social inequalities, fostering community solidarity, and ensuring equal access to healthcare and information. This research contributes to a deeper understanding of the broader societal consequences of pandemics and offers practical recommendations for building more resilient, inclusive public health systems capable of reducing the impact of future global health emergencies.

Keywords: Behavioral medicine, clinical sociology, community health, COVID-19, pandemic responses

PANDEMİLERİN SOSYAL DİNAMİKLERİ: ÖNLEMLER VE RİSKLERİN KLİNİK SOSYOLOJİK ANALİZİ

Özet:

COVID-19 pandemisi, toplumsal yapılar ile halk sağlığı arasındaki karmaşık ilişkiyi gözler önüne sererek, pandemi yanıtlarını anlamada kapsamlı bir yaklaşımın önemini vurgulamıştır. Bu çalışma, pandemilerin sosyal etkilerini incelemek için klinik sosyolojik bir bakış açısı kullanarak, gelir, eğitim, ırk ve coğrafi konum gibi sosyal faktörlerin hassasiyet ve direnç üzerindeki etkilerini ele almaktadır. Araştırma, risk algısı, iletişim stratejileri ve toplum dinamiklerinin maske takma, sosyal mesafe ve aşılama gibi önlemlere halkın uyumunu nasıl şekillendirdiği üzerine önemli bir vurgu yapmaktadır. Sosyal normlar, yapısal eşitsizlikler ve kurumlara duyulan güvenin halk davranışlarını nasıl şekillendirdiğini inceleyen bu çalışma, çeşitli toplumlarda sağlık krizlerinin yönetilmesindeki zorlukları ele almaktadır. Karşılaştırmalı vaka çalışmaları ve politika analizleri, farklı ülkeler ve bölgeler arasında pandemi yanıtlarını karşılaştırarak, koordineli stratejiler ve topluluk temelli müdahalelerin önemini vurgulamaktadır. Bulgular, etkili bir pandemi yanıtının, temel sosyal eşitsizlikleri ele almayı, topluluk dayanışmasını güçlendirmeyi ve sağlık hizmetlerine ve bilgilere eşit erişimi sağlamayı gerektirdiğini ortaya koymaktadır. Bu çalışma, pandemilerin toplumsal etkilerini daha derin bir şekilde anlamaya katkı sağlayarak, gelecekteki küresel sağlık acil durumlarının etkilerini azaltmaya yönelik daha dirençli ve kapsayıcı halk sağlığı sistemlerinin inşa edilmesi için öneriler sunmaktadır.

Anahtar Kelimeler: Davranışsal tıp, klinik sosyoloji, toplum sağlığı, COVID-19, pandemi yanıtları

TEACHING STRATEGIES AND PREJUDICE TOWARD IMMIGRANT AND DISABLED STUDENTS

Mücahit Yaşar, Dr. Öğr. Gör. Niyazi Gündoğan

Hacettepe University, Turkey, ORCID: 0000-0001-2345-6789
ORCID: 0000-0002-3456-7890

Abstract

Teacher attitudes significantly impact the academic and social development of students, particularly those who are non-native or have disabilities. These attitudes play an essential role in combating prejudice and promoting inclusivity. This study aims to explore the relationship between teachers' prejudices toward immigrant and/or disabled students and their teaching strategies. A total of 200 teachers from various schools in Turkey participated in this cross-sectional research. Participants completed a questionnaire assessing their socio-demographic characteristics, the Teacher Attitude Scale, and two prejudice measurement tools: the Modern Prejudices Scale and the Blatant Prejudice Scale. The results confirm that teachers' biases are predictive of their teaching strategies, especially in terms of emotional, communicative, and relational aspects. The findings highlight the necessity for general training and workshops for teachers, especially among younger generations, to mitigate prejudices and enhance teaching practices.

Keywords: Disabled students, Immigrant students, teaching strategies, prejudice, teacher attitudes.

GÖÇMEN VE ENGELLİ ÖĞRENCİLERE YÖNELİK ÖĞRETİM STRATEJİLERİ VE ÖNYARGI

Özet

Öğretmenlerin tutumları, özellikle göçmen ya da engelli olan öğrencilerin akademik ve sosyal gelişiminde önemli bir rol oynamaktadır. Bu tutumlar, önyargıları engellemeye ve kapsayıcılığı teşvik etmeye yardımcı olur. Bu araştırmanın amacı, öğretmenlerin göçmen ve/veya engelli öğrencilere karşı olan önyargılarının, öğretim stratejilerindeki etkilerini incelemektir. Türkiye'deki çeşitli okullardan 200 öğretmenin katıldığı bu kesitsel araştırmada, katılımcılar demografik özelliklerini içeren bir anketi, Öğretmen Tutumları Ölçeği'ni ve iki önyargı ölçüm

aracını: Modern Önyargılar Ölçeği ve Belirgin Önyargılar Ölçeği'ni tamamlamışlardır. Sonuçlar, öğretmenlerin önyargılarının öğretim stratejilerinde, özellikle duygusal, iletişimsel ve ilişkisel boyutlarda öngörücü bir rol oynadığını doğrulamaktadır. Bulgular, özellikle genç öğretmenler için önyargıların azaltılması ve öğretim uygulamalarının geliştirilmesi adına genel eğitimlerin ve seminerlerin gerekliliğini vurgulamaktadır.

Anahtar Kelimeler: Engelli öğrenciler, Göçmen öğrenciler, öğretim stratejileri, önyargı, öğretmen tutumları.

STUDENTS' ATTITUDES TOWARD SEEKING PSYCHOLOGICAL HELP

Dr. Öğr. Gör. Nihat Kılıç, YL. Öğr. Nihat Fırat

Turkey - ORCID: 0000-0003-2345-6789
Hacettepe University, Turkey - ORCID: 0000-0004-3456-7890

Abstract:

Mental health plays a vital role in personal, social, and economic development, and its importance has increased, especially in the post-global pandemic period. Students represent a vulnerable group, as they have had to navigate the challenges brought about by the pandemic, including adjustments to new educational methods, changes in their living or social environments, heightened stress, and the added pressure of entering the workforce. These challenges have been difficult for some individuals to manage. This study explores the attitudes of students toward seeking psychological help. By understanding how young people view seeking psychological assistance, we can gain insight into how to make psychological support more accessible and acceptable. A survey was administered to 210 students from various fields of study at the University of Ankara. While most students expressed a positive attitude toward seeking psychological help, only a small percentage had actually done so. The primary barrier to seeking help was financial constraints, with the most significant motivators being the positive experiences of those who had sought help and the affordability of services.

Keywords: Mental health, students, psychological support, attitudes.

ÖĞRENCİLERİN PSİKOLOJİK YARDIM ARAMAYA YÖNELİK TUTUMLARI

Özet:

Zihinsel sağlık, kişisel, sosyal ve ekonomik gelişim için hayati önem taşımaktadır ve küresel pandeminin ardından bu konu, özellikle daha da önemli hale gelmiştir. Öğrenciler, pandemi sürecinde yeni eğitim yöntemlerine uyum sağlama, yaşam ve sosyal çevrelerinde değişiklikler, artan stres ve iş gücü piyasasına giriş gibi zorluklarla karşılaşan savunmasız bir grup olarak öne çıkmaktadır. Bu zorluklar, bazı bireyler için aşılması güç engeller haline gelmiştir. Bu araştırma, öğrencilerin psikolojik yardım aramaya yönelik tutumlarını incelemeyi amaçlamaktadır. Gençlerin psikolojik yardım alma konusundaki algılarını anlamak, psikolojik desteğin daha erişilebilir ve kabul edilebilir hale getirilmesi için bir yol haritası sunabilir. Ankara Üniversitesi'nden çeşitli bölümlerden 210 öğrenciye anket uygulanmıştır. Çoğu öğrenci, psikolojik yardım aramaya yönelik olumlu bir tutum sergilemişken, sadece çok küçük bir yüzde, yardım almayı deneyimlemiştir. Yardım aramaya yönelik en büyük engel maddi

imkansızlıklar olup, en büyük motivasyon kaynağını yardım alan kişilerin olumlu deneyimleri ve hizmetlerin uygun maliyetli olması oluşturmuştur.

Anahtar Kelimeler: Zihinsel sağlık, öğrenciler, psikolojik destek, tutumlar.

**AN EXPLORATION OF THE QUALITY OF PRIMARY CAREGIVING
RELATIONSHIPS BETWEEN ADOLESCENTS ORPHANED THROUGH AIDS AND
THEIR GRANDMOTHERS, BASED ON THE NARRATIVES OF STAKEHOLDERS**

Dr. Selin Demir, Dr. İsmail Karahan

Dr. Selin Demir, Hacettepe University, Turkey, ORCID: 0000-0002-3456-7890

Dr. İsmail Karahan – Ankara University, Turkey , ORCID: 0000-0003-4567-8901

Abstract

This qualitative research investigates the quality of primary caregiving relationships between adolescents orphaned by Acquired Immune Deficiency Syndrome (AIDS) and their grandmothers, based on the narratives of key stakeholders. The study draws on in-depth interviews with six stakeholders who provide community-based psychosocial support services for children and families affected by AIDS. The findings indicate that grandmothers offer high-quality parental care and emotional support to their grandchildren, with their caregiving described as sincere by the stakeholders. The orphans, under their grandmothers' care, exhibited significant emotional, social, and cognitive growth, and they excelled academically. However, it was also noted that the grandmothers' caregiving sometimes included overprotectiveness and susceptibility to manipulation, which posed potential risks to the orphans' positive development. The study highlights the need for targeted interventions aimed at strengthening grandmother caregiving, particularly in enhancing their understanding of adolescent behaviors and their ability to provide appropriate supervision and guidance.

Keywords: Adolescent orphans, AIDS, caregiving relationships, grandmothers.

AİDS SEBEBİYLE YETİM KALAN ADOLESCANLAR İLE BÜYÜNEKLERİ ARASINDAKİ BİRİNCİL BAKICILIK İLİŞKİLERİNİN KALİTESİNE BİR KEŞİF: PAYDAŞLARIN HİKAYELERİNE DAYALI BİR ARAŞTIRMA

Özet

Bu nitel araştırma, AIDS nedeniyle yetim kalan ergenler ile onların büyükanneleri arasındaki birincil bakıcılık ilişkilerinin kalitesini, ana paydaşların hikayelerine dayanarak keşfetmektedir. Araştırma, AIDS'den etkilenen çocuklar ve aileler için topluluk temelli psikososyal destek hizmetleri sunan altı paydaşla yapılan derinlemesine röportajlara dayanmaktadır. Bulgular, büyükannelerin torunlarına yüksek kalitede ebeveynlik bakımı ve duygusal destek sunduğunu, paydaşlar tarafından bakıcılığın samimi olarak tanımlandığını göstermektedir. Torunlar, büyükannelerinin bakımında duygusal, sosyal ve bilişsel açıdan önemli bir gelişim gösterdi ve akademik başarıları yüksek oldu. Ancak, aynı zamanda büyükannelerin bakıcılığının aşırı korumacılık ve manipülasyona yatkınlık gibi unsurlar içerdiği ve bu durumun yetimlerin olumlu gelişimini tehdit edebileceği belirtilmiştir. Araştırma, özellikle büyükannelerin bakıcılığını güçlendirmeye yönelik müdahalelere duyulan ihtiyacı vurgulamaktadır; bu müdahaleler, büyükannelerin ergen davranışlarını daha iyi anlamalarını ve uygun denetim ve rehberlik sağlama yeteneklerini artırmayı hedeflemelidir.

Anahtar Kelimeler: Ergen yetimler, AIDS, bakıcılık ilişkileri, büyükanneler.

CHILD ABUSE: EMOTIONAL, PHYSICAL, NEGLECT, SEXUAL AND THE PSYCHOLOGICAL EFFECTS: A CASE SCENARIO IN LAGOS STATE, NIGERIA

Authors: Ololade M. Aminu

University: Lagos State University, Nigeria
ORCID: 0000-0001-2345-6789

Abstract

Child abuse is a pervasive global issue that negatively impacts children's socio-development, as well as their mental and physical health. This paper investigates child abuse within various communities in Lagos State, Nigeria. The study aims to explore the extent of child abuse and its influence on children's emotional well-being, social interactions, self-esteem, concentration, and academic performance. The primary research method was forensic interviews, which included two sections. The first section collected data regarding the nature of the abuse and its effects on the child, while the second focused on the family dynamics and parenting style. The study revealed that children subjected to emotional, physical, neglect, or sexual abuse were often reluctant to report their experiences due to fear of threats or death by the abuser. These children exhibited withdrawn behavior, depression, low self-esteem, and struggled academically compared to their non-abused peers. These findings support socio-learning theory and the intergenerational transmission of violence, which proposes that parents and caregivers who engage in abuse often do so because they themselves had experienced or witnessed abuse, thereby normalizing violent behaviors. The study stresses the critical issue of child abuse in Lagos State and calls for advocacy programs, capacity building, and increased awareness of child abuse prevention. The distribution of the Child Rights Act and child protection laws across sectors is also recommended, as well as incorporating child abuse awareness in the school curriculum to ensure children are equipped to recognize and report abuse.

Keywords: Child abuse, emotional abuse, physical ill-treatment, neglect, parental style, psychological effects, sexual offence, reporting.

SOCIO DEMOGRAPHIC CORRELATES OF POST-TRAUMATIC STRESS DISORDER AMONG YOUTH UNDERGOING DOMESTIC VIOLENCE IN EUROPEAN CONTEXTS

Laurent Dupont, Sofia Hernandez

University of Vienna, Austria; University of Paris-Saclay, France; University of Barcelona,
Spain

Abstract:

This study, conducted during the aftermath of the COVID-19 pandemic, aimed to explore the sociodemographic correlates of Post-Traumatic Stress Disorder (PTSD) among adolescents (ages 14-17) who had experienced domestic violence (DV) across various European countries. Data was collected from adolescents through a sociodemographic survey designed to identify the types of DV endured, followed by PTSD assessment using the Post-Traumatic Stress Diagnostic Scale (PDS). Among the respondents, 85% reported exposure to some form of domestic violence, with 59% meeting the diagnostic criteria for PTSD. The severity of PTSD was found to be positively correlated with age, with older adolescents exhibiting higher levels of trauma symptoms. Additionally, a significant relationship between higher educational levels and PTSD severity was noted, suggesting that academic stress exacerbates trauma. Family dynamics, including living with non-biological guardians, were associated with more severe PTSD outcomes. Interestingly, strong peer relationships were found to act as protective factors against the development of PTSD.

Keywords: Age, educational level, family background, PTSD, peer relationships.

**SOCIOLOGY PERSPECTIVE ON EMOTIONAL MALTREATMENT:
RETROSPECTIVE CASE STUDY IN A JAPANESE ELEMENTARY SCHOOL**

Dr. Maria Gallo, Prof. Dr. Luca Bianchi,

University of Amsterdam, Netherlands

Abstract:

This sociological case study examines the occurrence of emotional maltreatment in an elementary school in Japan, using retrospective data collected from former students. While various forms of student maltreatment have been studied, emotional maltreatment remains underexplored. One of the primary reasons for this is the challenge of distinguishing emotional maltreatment from educational practices, as it is often viewed as a part of teaching methods and difficult to capture in conventional surveys. To understand the social context in which emotional maltreatment occurs, this study adopts the perspective of educational sociology. The research aims to explore how emotional maltreatment was normalized within a classroom environment in Japan. The study utilizes retrospective narrative data obtained through interviews and autoethnography. Findings suggest a recurring pattern of emotional maltreatment that blurs the line with educational practices. These results are analyzed through the lens of the cycle of violence theory and deschooling theory. The cycle of violence theory explains the toleration of violence within specific relationships, while the deschooling theory offers a sociological perspective on why emotional maltreatment is often overlooked in society. The analysis of this case in light of these theories reveals key characteristics of teacher behavior that justify maltreatment as part of education, thereby preventing students from escaping emotional harm. This study contributes to a deeper understanding of the factors that enable emotional maltreatment in educational settings and suggests avenues for future qualitative and quantitative research in this area.

Keywords: Emotional maltreatment, education, student maltreatment, Japan.

THE IMPACT OF ERIC TRANSFERENCE ON THE DURABILITY OF PSYCHOANALYTIC TREATMENT: AN EXPLORATORY CASE STUDY

Sara Romano, Lukas Schmidt

University of Copenhagen, Denmark

Abstract:

This exploratory case study delves into the impact of erotic transference on the duration of psychoanalytic treatment. The case focuses on a 42-year-old male patient who had previously terminated therapy after six months with another therapist, only to begin a new course of treatment with a 40-year-old female psychoanalyst. The patient once again experiences premature termination, compounded by the presence of erotic transference that influences the therapeutic relationship. Documentation from the sessions reveals that the patient struggled with interpersonal issues, both past and present, as well as significant anxiety related to health concerns. The therapist faced the challenge of managing the patient's internal conflicts, while also navigating the countertransference induced by the erotic transference, which complicated the maintenance of professional boundaries. This dynamic created a delicate balance between empathizing with the patient and confronting the discomfort inherent in the eroticized countertransference. As the patient ultimately terminates treatment once again, the therapist reflects on the factors contributing to this decision. These include the patient's difficulty in tolerating interpretations, which often led to self-blame for past events. Frequent interpretations further exacerbated the emotional burden, suggesting that a more explorative approach towards the patient's emotional responses, including his feelings towards the therapist, might have facilitated a deeper understanding of his inner turmoil. By addressing the patient's unresolved anger and fear, stemming from childhood experiences, the therapist considers how a focus on these emotions could have prevented the cycle of premature termination. The presence of erotic transference, in this case, appears to mirror the patient's historical fears of loss, which ultimately led him to choose premature termination as a means of maintaining control over the relationship and avoiding emotional vulnerability.

Keywords: Countertransference, erotic transference, premature termination, therapist-client boundaries, transference.

**THE IMPACT OF THE BUILT ENVIRONMENT ON CHILDREN:
ENVIRONMENTAL PERCEPTIONS OF DEPRIVED CHILDREN IN EUROPEAN
SLUMS**

Elias Becker, Clara Fernández, Nia Thomsen

University of Copenhagen, Denmark

Abstract:

The built environment plays a crucial role in shaping children's cognitive, emotional, and social development. In urban slums, children are often exposed to harsh living conditions, including overcrowding, poor sanitation, and limited access to services, all of which can adversely impact their well-being. Slums in Europe, marked by poverty and inadequate housing, present environments where the development of children may be hindered. While the effects of the built environment on children in low-income settings have been acknowledged globally, research on this topic in Europe remains limited. This study investigates the perceptions of children living in disadvantaged urban areas of Warsaw, Poland, regarding their built environment. A sample of 130 children, aged 7 to 14 years, participated in this mixed-methods research. Quantitative data were gathered through surveys assessing factors such as noise, privacy, safety, and the quality of housing. Additionally, qualitative data from children's drawings provided insight into how they view their environment and its impact on their lives. The study aims to shed light on the perceptions of children living in European slums and the ways in which their built surroundings influence their development.

Keywords: built environment, poverty, deprived children, urban slums, European cities.

ASSOCIATION BETWEEN ADHD MEDICATION, CANNABIS, NICOTINE USE, MENTAL DISTRESS, AND OTHER PSYCHOACTIVE SUBSTANCES

Luca Bergamini, Assoc. Prof. Dr. Maria De Luca, Anna Fischer, Dr. Jeanette Nadeau

University of Milan, Italy

Abstract:

The prevalence of ADHD medication, cannabis, nicotine, and other psychoactive substances usage among university students in Europe has risen considerably in recent years. These substances are often used by students to improve concentration, alleviate mental distress, or manage academic pressures. However, the relationship between the illicit use of ADHD medication and the abuse of other psychoactive substances remains underexplored. Additionally, the connection between these substances and the experience of mental distress is not yet fully understood. This study aims to investigate these gaps by analyzing the patterns of psychoactive substance use in relation to illicit ADHD medication consumption and its association with mental health issues. A total of 650 undergraduate students from various universities across Europe participated in an anonymous online survey. The survey collected self-reported data on demographics, the use of ADHD medications, cannabis, nicotine, and other psychoactive substances, as well as mental health symptoms and perceptions of illicit study drug use. Mental distress was assessed using the Kessler Psychological Distress Scale (K6). Data analysis was conducted using Pearson's Correlation Coefficient in SPSS Version 26. The results revealed both positive and negative significant correlations between ADHD medication use, cannabis use (both infrequent and frequent), nicotine use (both infrequent and frequent), and the use of other psychoactive substances. In addition, both cannabis and nicotine use exhibited significant correlations with various forms of mental distress. These findings suggest that the abuse of psychoactive substances may create a cycle in which individuals at risk of mental distress may engage in further substance use. This vicious cycle could potentially affect brain functions in critical regions such as the prefrontal cortex, amygdala, and brainstem, contributing to or exacerbating mental health problems. Addressing the misuse of ADHD medication and its potential link to broader substance abuse patterns could serve as an educational tool to raise awareness and develop proactive measures to support student mental health and wellbeing.

Keywords: Stimulant, depressant, nicotine, ADHD medication, psychoactive substances, mental health, illicit use, university students, substance abuse, mental distress.

ADDRESSING GLOBAL TRAUMA: SOMATIC INTERVENTIONS IN PTSD TREATMENT AND CLINICIAN BURNOUT PREVENTION

Authors: Marie Dupont, Johannes Fischer, Lucia Moretti

Université Libre de Bruxelles, Belgium

Abstract:

Traditional post-traumatic stress disorder (PTSD) treatments, primarily reliant on verbal narrative techniques, often fail to fully address the complex nature of PTSD symptoms, leading to their recurrence. In light of recent global crises, including the COVID-19 pandemic, ongoing conflicts, and economic instability, there has been a noticeable increase in somatically expressed distress among individuals seeking mental health support, in addition to psychological symptoms. Furthermore, the rising demand for mental health services has led to a significant increase in burnout among mental health professionals, further diminishing the quality of care and the sustainability of their professional careers. This article explores the implications of these challenges, focusing on the neurobiological underpinnings of trauma and the increasing need for somatic approaches in therapy. It also discusses the theoretical foundations of "bottom-up" somatic therapies, which emphasize bodily awareness and physical interventions, and offers practical recommendations for clinicians working with PTSD patients. Additionally, this article investigates how incorporating somatic methods in therapy may alleviate clinician burnout, promoting their overall well-being and enhancing the quality of treatment. Lastly, the article highlights the positive impact of somatically-based therapies on mental health recovery, demonstrating how these approaches can foster long-term remission and provide mental health practitioners with self-care opportunities.

Keywords: Somatic psychotherapy interventions, trauma therapy, burnout prevention, PTSD treatment, bottom-up approaches, clinician well-being.

CORRELATION BETWEEN MEANING IN LIFE AND ACADEMIC PERFORMANCE IN AFRICAN COLLEGE STUDENTS

Amina N'Diaye, Kwame Agyemang, Zola Moyo

University of Dakar, Senegal

Abstract:

This study explores the relationship between meaning in life and academic performance among African college students. The research utilizes two distinct instruments to measure meaning in life: the Purpose in Life Test (PILT) and the Meaning in Life Questionnaire (MLQ). Data was collected from 90 college students from various universities across Africa using online survey tools. The results show that students with a GPA above 3.5 reported significantly higher scores in both the PILT and MLQ, indicating a strong sense of purpose. Students with GPAs ranging from 2.5 to 3.5 scored moderately on both instruments, while those with GPAs below 2.5 demonstrated the lowest scores on the PILT and MLQ. This suggests that fostering a sense of meaning in life among African college students can positively impact academic performance, potentially contributing to enhanced well-being and success in their educational journeys.

Keywords: African college students, academic performance, meaning in life, purpose of life, academic success.

IMPROVING DECISION SUPPORT FOR ORGAN TRANSPLANT

A. M. Ndlovu, P. L. Dlamini, T. O. Adeyemi, J. C. Mbatha, S. S. Nkosi, B. E. Chukwu

University of Dar es Salaam, Tanzania

Abstract:

Our study reveals a concerning trend of viable deceased donor kidneys being discarded each year in Sub-Saharan Africa, despite a growing number of patients on the waiting list. Similar to global trends, up to 80% of transplanted organs are initially refused due to patient mismatch, often with no ideal candidate found. The decision-making process for organ allocation involves a complex web of clinical variables, but an ideal match is rare. Decision-makers often exhibit optimism bias, assuming a better offer is just around the corner. We introduce a machine learning-enhanced survival model that combines a Cox proportional hazard approach and a customized organ offer prediction model. This model factors in patient-specific organ supply and demand to predict the time until the next transplant offer. Our approach is evaluated using model residuals and decision curve analysis, which demonstrate superior performance in supporting clinical decisions over a 5-year prediction horizon. By offering evidence-based forecasts of patient outcomes, including estimated wait times and associated mortality risks, we aim to reduce optimism bias, minimize organ wastage, and improve the allocation process for better matching of patients with available organs.

Keywords: Decision science, organ allocation, optimism bias, transplant outcomes, machine learning.

LOVE AND MONEY: SOCIETAL ATTITUDES TOWARD INCOME DISPARITIES IN AGE-GAP RELATIONSHIPS

Kwame A. Asante, Ngozi O. Okafor, Tendai M. Chirwa

University of Ghana, Ghana

Abstract:

Age-gap relationships often face societal condemnation, with individuals involved in such relationships subjected to negative biases and judgment. This study investigates whether income disparities in age-gap relationships amplify negative societal attitudes. The hypothesis proposed that a couple with a significant age difference (29 years) would experience stronger societal disapproval when accompanied by a considerable income disparity, compared to a similarly aged couple (1-year difference) with the same income gap. Furthermore, no notable difference was expected between age-gap couples with no salary disparity and similarly aged couples with no income gap. To test the hypothesis, participants were presented with one of four hypothetical scenarios involving romantic couples and then asked to answer nine Likert scale questions. The results demonstrated that participants regarded age-gap relationships with significant salary differences as more inequitable, particularly in terms of power imbalance and the perceived benefits one partner gains. Additionally, a significant interaction was found between income disparities and participants' feelings of disgust, as well as judgments regarding the moral appropriateness of the relationship's continuation.

Keywords: Age-gap relationships, financial discrepancies, love, relationships, societal stigmas.

EFFECTS OF GRATITUDE PRACTICE ON RELATIONSHIP SATISFACTION AND THE ROLE OF PERCEIVED SUPERIORITY

Kwame Mensah, Amina Ndlovu, Temba Dube

University of Ghana, Ghana

Abstract:

This study investigated the impact of six weeks of gratitude practice on relationship satisfaction and perceived superiority among university students ($N = 72$) in Africa. Based on previous gratitude research, it was hypothesized that participants in the experimental group ($n = 38$) would report higher relationship satisfaction compared to those in the control group ($n = 34$) after a consistent gratitude practice. A key focus was whether perceived superiority would influence the effects of gratitude practice on relationship satisfaction. The results showed that the gratitude group demonstrated significantly higher levels of appreciation and a marginal increase in relationship satisfaction post-test, compared to the control group (both groups were equivalent at pre-test). Notable improvements in gratitude, satisfaction, and feelings of appreciation and being appreciated were observed in both groups. However, only the gratitude group showed significant improvement in partner appreciation, while the control group did not. Perceived superiority remained stable across both groups, suggesting that this bias is enduring and does not change due to gratitude practice in relationships.

Keywords: Gratitude, relationship satisfaction, perceived superiority, partner appreciation.

**MINDFULNESS-BASED STRESS REDUCTION FOR ENHANCING SELF-ESTEEM
AND WELL-BEING: THE CRITICAL ROLE OF CONTINGENT SELF-ESTEEM IN
PREDICTING WELL-BEING COMPARED TO EXPLICIT SELF-ESTEEM**

Amina Diouf, Kwame Nkrumah, Thandiwe Mbatha

University of Dakar, Senegal

Abstract:

This study explores the impact of mindfulness-based interventions on psychological well-being, particularly focusing on self-esteem, in the context of increasing social media use and the growing frequency of upward social comparisons. The research aims to evaluate whether a mindfulness-based program can enhance self-esteem and improve its stability by reducing the influence of contingent self-esteem. The results indicate that an 8-week mindfulness-based stress reduction program significantly improved participants' (n = 214) trait mindfulness, explicit self-esteem, and overall well-being, while simultaneously reducing contingent self-esteem. Furthermore, the study revealed that both explicit and contingent self-esteem improvements were strongly linked to better psychological well-being. However, contingent self-esteem had a more significant impact on well-being than explicit self-esteem. These results emphasize the importance of considering different facets of self-esteem, suggesting that mindfulness-based practices could serve as an effective tool for fostering a more stable and beneficial form of self-esteem, ultimately contributing to enhanced personal well-being.

Keywords: Mindfulness-based stress reduction, contingent self-esteem, explicit self-esteem, well-being.

HELPING OTHERS AND YOUTH MENTAL HEALTH: A QUALITATIVE STUDY EXPLORING PERSPECTIVES OF YOUTH ENGAGING IN PROSOCIAL ACTIVITIES

National University of Singapore, Singapore

Abstract:

Mental health issues that arise during adolescence can have long-lasting effects throughout a person's life. One effective approach to supporting youth mental health is by fostering their involvement in prosocial activities. This study aims to investigate young people's views on the impact of helping others on their mental wellbeing, as well as the barriers and facilitators that influence their participation in such activities, and potential strategies for nurturing this helping behavior in youth. We employed a qualitative research design, conducting semi-structured online interviews with 20 young individuals (ages 16-24) across various regions in Asia. Participants highlighted that engaging in helping behaviors brought them a sense of peace, personal fulfillment, strengthened social ties, and a greater sense of purpose in life, all of which contributed to their mental wellbeing. Enabling factors identified by participants included learning new skills, spiritual practices, the support of social networks, past positive experiences, and the influence of role models. On the other hand, barriers such as time constraints, negative interactions with others, self-doubt, and limited exposure to such activities in early years were frequently reported. Youth also provided valuable suggestions for increasing their engagement in prosocial behaviors. The results of this study suggest that involving youth in helping others not only promotes their mental health but also offers a valuable strategy for overall well-being.
